you've tried the rest - now buy the best!

plastic coated hardwood

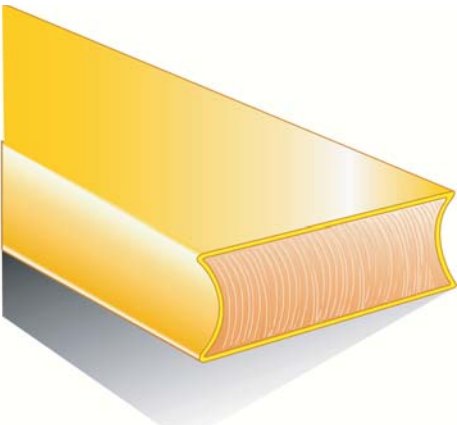

heavy-duty hardware

replaceable steel points

...made to perform under
the toughest conditions.

MADE IN GERMANY

the unique plastic coating keeps moisture out!

Nedo Wooden Tripods - made to perform under toughest conditions

- For Nedo wooden tripods, we use the finest European hardwood which is carefully selected to guarantee the utmost in stability, durability and reliability.
- All wooden parts are sealed with a high-tech plastic material that keeps moisture out. This ensures that there is no swelling, shrinking or splintering of wood and all joints remain tight. Not even the quick clamp needs readjustment. All die cast aluminum parts are powder-coated.
- The unique coating of wooden parts, the sturdy design and 100 years experience in manufacturing surveying equipment make Nedo wooden tripods unique in the market and perfect for use under the toughest conditions.
